ABOUT ME

I am a UI/UX Designer from Indonesia with 2 years of experience in designing web and mobile interfaces using Figma. I have worked on various projects, including school assignments and personal designs, with a strong focus on creating clean, functional, and user-friendly interfaces.

HARD SKILL

- UI/UX Design

Experienced in using Figma to create wireframes, prototypes, and clean user interfaces that are user-friendly. Focused on delivering simple, intuitive, and target-oriented user experiences.

- Front-End Developmen

Skilled in building responsive websites using HTML, Tailwind CSS, and Bootstrap, and integrating them seamlessly with pre-designed UI/UX layouts. Strong understanding of front-end principles that ensure functionality, aesthetics, and ease of use.

- Programming Languages

Proficient in HTML and Tailwind CSS for developing well-structured and responsive web pages.
